### Summary

---

From the moment I executed "Hello World" in the console of my first application, I knew that I was hooked into the world of software development. Learning how to code has offered me a fulfilling challenge to continually learn and improve my skills in creating high-quality software. What started with a simple "Hello World" and a few lines of code has developed into a full-fledged passion that continues to grow.

### Relevant Skills

---

Technical Skills		
• HTML	• React JS	• Data Entry (110WPM)
• CSS	• JavaScript	• Marketing
Non-Technical Skills		
	• Customer Service	

### Experience

---

- Platform Portfolio with Integrated animations, Responsive CSS
  - Built a Responsive Platform site with HTML, CSS, and JavaScript which utilizes Particles.JS
- Nature Site "GrowPlus" with WeatherAPI
  - Originated a Responsive nature/AI company site with HTML, CSS, JavaScript as well as an integrated WeatherAPI with default, preset, and city search functionality
